

on account of the extensive grain fields in that county, which were washed out. At Los Angeles, Cal., the heavy rains previous to the 15th caused considerable damage to the railroads, and the train service of the Southern Pacific and Santa Fé systems was interrupted by washouts. The Southern Pacific Railroad suffered severely on the deserts west of Yuma, Ariz., where a storm of unusual severity prevailed. Traffic was interrupted on the Santa Fé road by land slides in Cajon Pass, and all communication was cut off from San Diego, on the coast line, by washouts. The bridges on the California Southern Railroad between Santa Ana and Los Angeles were washed away on the 23d. At Los Angeles the heavy rains from the 22d to 26th caused considerable damage; streets were badly washed and the railroad bridges were generally destroyed. The Los Angeles River changed its channel south of the city, flooding the surrounding country. At Red Bluff, Cal., the high water, resulting from continuous rains previous to the 14th, was very destructive to bridges, etc. Reports state that in Tehama county the damage to public property will amount to \$40,000, while individual losses will aggregate \$250,000, and that adjoining counties to the southward suffered even greater injury from high water. The Rio Virgin River rose so high in the southern part of Lincoln Co., Nev., under the unprecedented rainfall, that it overflowed its banks in many places and changed its course, washing away everything in its path. Lake Tahoe is reported as having risen twelve inches. On the 5th the Salt and Verde rivers, in Arizona, rose very rapidly, and at Fort McDowell the Verde River overflowed its banks, flooding the adjacent lowlands. On the 6th, at Fort Verde, Ariz., the Verde River was higher than it has been during the last fifteen years, and considerable damage was caused along the river by the inundation of alfalfa fields, washing out of dams, etc.

STAGE OF WATER IN RIVERS AND HARBORS.

The following table shows the danger-points at the several

stations; the highest and lowest water during December, 1889, with the dates of occurrence and the monthly ranges:

Heights of rivers above low-water mark, December, 1889 (in feet and tenths).

Stations.	Danger-point on gauge.	Highest water.		Lowest water.		Monthly range.
		Date.	Height.	Date.	Height.

LOW TIDE.

At New London, Conn., the lowest tide noted for many years occurred on the 23d.

ATMOSPHERIC ELECTRICITY.

AURORAS.

Fort Buford, N. Dak.: a faint auroral display of a light yellow tint was observed in about azimuth 40° and altitude 8° at 11.12 p. m., 13th, and continued without any marked change until 1.40 a. m., 14th. Another aurora was observed at 10.48 p. m., 26th. It consisted of an irregular arch resting on a well-defined dark base, which extended over about 75° of azimuth from northwest to northeast, and rose to about altitude 25°. The color was white through the centre of the arch, and the outer edges were of a yellow tint. Up to 1.15 a. m. of the 27th the aurora remained unchanged, and a few traces were still visible at 7.15 a. m.

Hartford, Conn.: an auroral display was first observed at 8.55 p. m., 15th; stripes of light, interspersed with clear sky, covered 40° of the horizon, and rose half way up to the zenith.

Leaf River, Ill., 26th: very high tension on telegraph lines, and long circuits working strong and clear were followed at night by a bright auroral arch, which was visible as late as 12.30 a. m., 27th.

Fort Maginnis, Mont.: an aurora was observed in the northeast from 1.36 a. m. until 3 a. m. 27th. It consisted of luminous beams, which rose to altitude 45° and extended from about azimuth 180° to 270°. The color of the display was of a pale yellow and red.

Auroras were observed during the month as follows: 3d, Setauket, N. Y. 4th, Seven Pines, W. Va. 12th, Cresco, Iowa. 13th, Carson, Iowa. 14th, Fort Buford, N. Dak.; Webster, S. Dak. 15th, Hartford, Conn.; Dana, Ind.; Wah-

peton, N. Dak. 16th, Orono, Me. 18th, Greenwood, Wis. 21st, Orono, Me.; Fort Assiniboine, Mont.; Leech Farm, N. Dak. 22d, Fort Assiniboine, Mont.; Webster, S. Dak. 24th, Liberty, Va.; Tannery, W. Va. 26th, Winnebago, Ill.; Cresco and Maquoketa, Iowa; Fort Buford and Wahpeton, N. Dak.; Grantsburgh and Madison, Wis. 27th, Leaf River, Ill.; Berrien Springs, Mich.; Fort Maginnis, Mont.; Nashua, N. H.; Lyons, N. Y. 29th, Delavan, Wis.

THUNDER-STORMS.

Thunder-storms were reported in the greatest number of states and territories, fourteen, on the 21st; in twelve, on the 10th; in from six to ten, inclusive, on the 20th, 22d, 24th, 25th, 26th, 28th and 29th; and in from one to four, inclusive, on the 3d to 9th, 11th, 13th to 19th, 23d, 30th, and 31st. The 1st, 2d, 12th, and 27th were the only dates on which no thunder-storms were reported.

Thunder-storms were reported on the greatest number of dates, sixteen, in Michigan; on twelve in Illinois and Indiana; on ten in California; on nine in Ohio; on seven in Kansas and Missouri; and on from one to six, inclusive, in Alabama, Arizona, Arkansas, Indian Territory, Iowa, Kentucky, Louisiana, Massachusetts, Minnesota, Mississippi, Nebraska, New Jersey, New York, Oregon, Pennsylvania, South Dakota, Tennessee, Texas, Virginia, West Virginia, and Wisconsin. In states and territories other than those named no thunder-storms were reported.

Leaf River, Ill.: high electrical tension with severe electrical shocks, but absence of thunder and lightning, were noted at 3.50 p. m., 21st.
